

Celebrating Health and Safety with Family

On that day, Simon Karam – Sarooj Construction Director stated “Having achieved 6 million hours LTI free means that we must have done something right”, he added “But what is important is that we managed to watch out over the Health & Safety of our family for over 6 million hours and that is the ultimate achievement here... And the thought of that is the only thing that helps me sleep at night with a clear conscious”.

In addition, BP Project Director Phil Matheson and WORLEY Construction Director John McIntyre expressed their gratitude towards such an achievement and shared some words of their own.

Afterwards, HSE appreciation rewards were handed out to individuals who are characterized by an outstanding HSE Drive, followed by cutting of the cake and some refreshments.

Overall, the celebration was a success... and on that note we would like to congratulate our family in SC128 in specific and the whole of Sarooj Construction in general on this outstanding achievement.

Well done SC128!
